This year's **OSS 2022: For Our Collective Rights & Freedom** program will include special discussions on the harmful impact that the slate of laws passed through the Florida legislature will have on the rights of women, immigrants, people of color, workers, and LGBTQ+ Floridians. We are living through unprecedented times which require unprecedented collective action. Together, we will do deeper dives into how these hate-inspired laws in Florida – including Don't Say LGBTQ, Stop Woke, Abortion Ban, License to Discriminate in Health Care and Trans Youth Healthcare Ban, Anti-immigrant Laws targetting unaccompanied youth and increasing profiling and enforcement – are being implemented in our region and across the state and are affecting the lives of those we care for.
